The following is an examiner's statement of reasons for allowance: The instant application is held to be in condition for allowance inasmuch as the closest prior art, Gilbert, Jr., US 3,052,517, teaches away from applicants' invention, disclosing temperatures in the range of 0 and 30 degrees Celsius may be used in a similar process. Low temperatures are used to prevent side reactions. By carrying out applicants' process using their reaction conditions, generally higher yields and much greater purity is obtained. Nagy, US 2,562,869, and Sprague et al., US 3,279,885, are cited as state of the art only.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Peter G O'Sullivan at telephone number (571)272-0642.
